

Plastic Collage

Trace plastic from production to pollution.

Participants follow plastic's full lifecycle, from raw materials to sorting, recycling failures and pollution, and explore its environmental and social impacts. They leave understanding why the crisis is so hard to solve, and where change is possible.

400

million tonnes of plastic produced every year

9%

only of plastic ever produced has been recycled

How a session unfolds

1

Comprehension

In teams, participants map plastic's full lifecycle, from extraction and production to sorting, recycling failures and pollution.

2

Creativity

Participants illustrate their key messages and give their collage a title, building a shared team identity.

3

Emotions

Participants share what strikes them most and feels most urgent, turning individual reactions into a group conversation.

4

Action

The session ends with a brainstorm on individual and collective solutions, and on the institutional and systemic changes needed.

Who it's for

Companies

Packaging, procurement and product teams, CSR/ESG programs, team-building events

Universities & Schools

Courses, orientation weeks, student clubs (Junior version available, age 9+)

Local Governments

Education programs for local SMEs, staff training, community clean-up events

Non-profit organizations

Staff and board alignment sessions, volunteer training, partner engagement

Logistics & Format

2-3 hours

4-14 per facilitator

Japanese / English

In-person / Online

Adults 15+ / Junior 9+
